

## Appeal for Help for Hania Sierocki

Dear Sir,

Our daughter Hanna is 2,5-years old girl (born Oct 2004). When she was 3 months old she was diagnosed with **D-2-hydroxyglutaric aciduria (D2HGA)** - a very rare inborn metabolic disorder with about only 60 cases around the world. D2HGA is probably the cause of most Hania's disabilities like: progressing hearing loss , glaucoma, sight defect, scoliosis, long bones dysplasia, craniostenosis. Because of delayed brain mielination Hania is markedly developmentally delayed. Today she even can't walk or talk.

Despite all Hania's disabilities she is quite communicable and very joyful little girl. Our doctors don't know how to help our Hanna despite a lot of tests done. But we know that we can help her to develop better. Since diagnosis Hania is intensively physically and psychically rehabilitated. The results are promising - when she was 1,5 years old she started crawling. Since then she started to have an initiative to learn the world by her own. We are also now impressed with her babbling for about last few months.

But for the best results we have to go with her every 3-4 weeks for intensive rehabilitation camps where Hanna works with specialists from dawn to the evening every day for 2-3 weeks. Unfortunately the camps are not refunded by health insurance. And its costs are beyond our current financial abilities.

**We turn to you for help for our daughter. Every amount of money given for Hania's bank account means healthier and better life for her in the future.**

Hania's bank account is maintained by The Foundation for Children "Help on Time" (*Fundacja Dzieciom "Zdążyć z pomocą"*) which is under the supervision of prof. Zbigniew Religa, Minister of Health. It means that all money will be used only for Hania's rehabilitation or treatment. The donation may be deducted from the income tax.
